## 2007 Kinross Regional Data Tables

The Regional Data Tables are an indicator supplement to the 2007 Kinross Corporate Responsibility Report. The tables report in accordance with the Global Reporting Initiative G3 guidelines on performance at operations and growth projects where Kinross held a majority ownership position in 2007 and/or those operations and joint ventures where Kinross was the operating partner responsible for management and operation for the majority of 2007. Site-specific information is reported for the fiscal year ended December 2007 and includes 2005 and 2006 performance data where available. Data have been reported for operations acquired by Kinross during the year, and for those in which we assumed a controlling ownership position through our transaction with Bema Gold Corporation, completed in February 2007. We have reported performance for the full-year 2007, with the exception of our Julietta mine in Russia, where we have reported on performance from the acquisition date. Our data do not include the Kubaka mine in Russia, which became non-operational in 2006. Performance is reported on a 100% basis, regardless of ownership. To learn more about our performance, see the 2007 Kinross Corporate Responsibility Report.
