

Environmental stewardship is a priority for Kinross, consistent with our core value of Outstanding Corporate Citizenship. We strive to minimize our environmental footprint wherever we work and to address our environmental responsibilities in a manner that demonstrates our commitment to industry-wide leadership. This requires that we:

ESTABLISH HIGH STANDARDS FOR PERFORMANCE

- Comply with applicable laws, regulations and commitments and promote environmental best practices wherever we operate.
- Ensure we have the necessary resources, procedures and controls, training programs, and responsibilities in place to achieve outstanding environmental performance.
- Strive to protect air and water quality, minimize consumption of water and energy, and protect natural habitats and biodiversity.

ENGAGE OUR STAKEHOLDERS

- Promote an ongoing environmental dialogue, maintained in a spirit of transparency and good faith, with our stakeholders in the communities where we operate.
- Collaborate with stakeholders to define environmental priorities and to contribute to the development of responsible laws and regulations to protect the environment.

PLAN FOR THE ENTIRE LIFE-CYCLE OF OUR ACTIVITIES

- Consider within our project plans and designs the requirement for environmental protection at all stages of exploration, development, operation and closure.
- Develop and maintain reclamation and closure plans, account for associated costs in our business plans, and effectively address our reclamation and closure obligations.

HOLD OURSELVES ACCOUNTABLE FOR OUR PERFORMANCE

- Routinely monitor our performance through inspection, review and audit to verify compliance with performance standards and compliance requirements.
- Hold leadership accountable for achieving outstanding environmental performance and reward and recognize behavior that supports environmental stewardship.

MEASURE AND REPORT OUR PERFORMANCE

- Measure and report our environmental performance transparently, including publication of a comprehensive corporate responsibility report.
- Assign responsibility for areas requiring improvement.

The Corporate Responsibility Committee of the Board of Directors meets on a regular basis to monitor environmental performance and confirm that Kinross adheres to this policy.
